

**THE DATASHEET OF  
TPD1E05U06DPYT**

# TPDxE05U06 1, 4, 6 Channel ESD Protection Device for Super-Speed (Up to 6 Gbps) Interface

## 1 Features

- IEC 61000-4-2 Level 4 ESD Protection
  - $\pm 12$ -kV Contact Discharge
  - $\pm 15$ -kV Air Gap Discharge
- IEC 61000-4-4 EFT Protection
  - 80 A (5/50 ns)
- IEC 61000-4-5 Surge Protection
  - 2.5 A (8/20  $\mu$ s)
- IO Capacitance 0.42 pF to 0.5 pF (Typical)
- DC Breakdown Voltage 6.5 V (Minimum)
- Ultra low Leakage Current 10 nA (Maximum)
- Low ESD Clamping Voltage
- Industrial Temperature Range:  $-40^{\circ}\text{C}$  to  $+125^{\circ}\text{C}$
- Easy Straight-Through Routing Packages

## 2 Applications

- HDMI 1.4b
- HDMI 2.0
- USB 3.0
- MHL
- LVDS Interfaces
- DisplayPort
- PCI-Express<sup>®</sup>
- eSata Interfaces
- V-by-One<sup>®</sup> HS

## 3 Description

The TPDxE05U06 is a family of unidirectional Transient Voltage Suppressor (TVS) based Electrostatic Discharge (ESD) protection diodes with ultra-low capacitance. Each device can dissipate ESD strikes above the maximum level specified by the IEC 61000-4-2 international standard. The TPDxE05U06s ultra-low loading capacitance makes it ideal for protecting any high-speed signal pins.

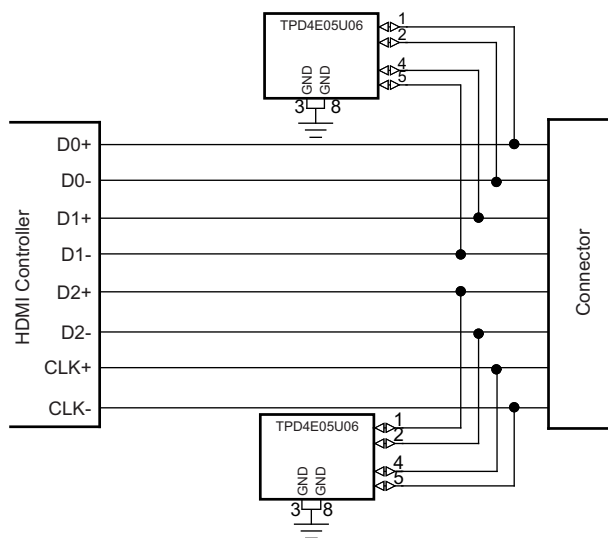

Typical applications for TPDxE05U06 includes high speed signal lines in HDMI 1.4b, HDMI 2.0, USB 3.0, MHL, LVDS, DisplayPort, PCI-Express<sup>®</sup>, eSata, and V-by-One<sup>®</sup> HS.

### Device Information<sup>(1)</sup>

PART NUMBER	PACKAGE	BODY SIZE (NOM)
TPD1E05U06	X1SON (2)	0.60 mm x 1.00 mm
TPD4E05U06	USON (10)	2.50 mm x 1.00 mm
TPD6E05U06	USON (14)	3.50 mm x 1.35 mm

(1) For all available packages, see the orderable addendum at the end of the datasheet.

## 4 Revision History

NOTE: Page numbers for previous revisions may differ from page numbers in the current version.

<b>Changes from Revision K (November 2016) to Revision L</b>	<b>Page</b>
• Updated DPY pinout image.....	<b>4</b>
• Updated title from TPD4E05U06 to TPD6E05U06 in <a href="#">Figure 13</a> .....	<b>10</b>

<b>Changes from Revision J (March 2016) to Revision K</b>	<b>Page</b>
• Changed min value of $V_{BR}$ from "6 V" to "6.5 V" in the <a href="#">Electrical Characteristics</a> table.....	<b>7</b>

<b>Changes from Revision I (June 2015) to Revision J</b>	<b>Page</b>
• Replaced all instances of X2SON with X1SON.....	<b>1</b>
• Update the <i>Pin Functions</i> table .....	<b>4</b>
• Added <a href="#">Power Supply Recommendations</a> section.....	<b>16</b>

<b>Changes from Revision H (May 2015) to Revision I</b>	<b>Page</b>
• Added Trademarks .....	<b>1</b>
• Corrected TPD6E05U06 Pin 13 name .....	<b>5</b>
• Corrected TLP definition .....	<b>7</b>

<b>Changes from Revision G (July 2014) to Revision H</b>	<b>Page</b>
• Added Additional Application.....	<b>1</b>
• Updated with HDMI 2.0 Eye Diagrams.....	<b>13</b>

<b>Changes from Revision F (November 2013) to Revision G</b>	<b>Page</b>
• Added 61000-4-4 EFT compliance.....	1
• Added Handling Ratings table.....	6
• Added Thermal Information table. ....	6
• Added Detailed Description section. ....	10
• Added Application and Implementation section. ....	12
• Added Layout section. ....	16

<b>Changes from Original (December 2012) to Revision A</b>	<b>Page</b>
• Added TPS2EUSB30A part to document.....	1

<b>Changes from Revision A (December 2012) to Revision B</b>	<b>Page</b>
• Added Insertion Loss Graphic.....	9
• Added Eye Diagrams.....	13

<b>Changes from Revision B (January 2013) to Revision C</b>	<b>Page</b>
• Changed IO Capacitance range.....	1
• Changed test conditions and typ values for $V_{\text{clamp}}$ .....	7
• Added typ $R_{\text{DYN}}$ values for DQA and RVZ packages.....	7
• Added $C_L$ values for DQA and RVZ packages.....	7
• Changed CURRENT vs VOLTAGE graphic.....	8
• Changed Insertion Loss graphic.....	9
• Changed HDMI Eye Diagrams.....	13

<b>Changes from Revision C (March 2013) to Revision D</b>	<b>Page</b>
• Updated Title.....	1
• Removed Ordering Information table.....	4

<b>Changes from Revision D (August 2013) to Revision E</b>	<b>Page</b>
• Updated document formatting.....	1
• Added additional application.....	1

## 6 Specifications

### 6.1 Absolute Maximum Ratings<sup>(1)(2)(3)</sup>

over operating free-air temperature range (unless otherwise noted)

		MIN	MAX	UNIT
Electrical fast transient	IEC 61000-4-4 (5/50 ns)		80	A
Peak pulse	IEC 61000-4-5 Current (tp – 8/20 μs) <sup>(4)</sup>		2.5	A
	IEC 61000-4-5 Power (tp – 8/20 μs) <sup>(4)</sup>		40	W
T <sub>A</sub>	Operating temperature	–40	125	°C
T <sub>stg</sub>	Storage temperature	–65	155	°C

- (1) Stresses beyond those listed under *absolute maximum ratings* may cause permanent damage to the device. These are stress ratings only and functional operation of the device at these or any other conditions beyond those indicated under *recommended operating conditions* is not implied. Exposure to absolute-maximum-rated conditions for extended periods may affect device reliability.
- (2) Absolute maximum ratings apply over recommended junction temperature range.
- (3) Voltages are with respect to GND unless otherwise noted.
- (4) Measured at 25°C.

### 6.2 ESD Ratings—JEDEC Specification

		VALUE	UNIT
V <sub>(ESD)</sub>	Electrostatic discharge	Human-body model (HBM), per ANSI/ESDA/JEDEC JS-001 <sup>(1)</sup>	±4000
		Charged-device model (CDM), per JEDEC specification JESD22-C101 <sup>(2)</sup>	±1500

- (1) JEDEC document JEP155 states that 500-V HBM allows safe manufacturing with a standard ESD control process. Manufacturing with less than 500-V HBM is possible with the necessary precautions. Pins listed as ±4000 V may actually have higher performance.
- (2) JEDEC document JEP157 states that 250-V CDM allows safe manufacturing with a standard ESD control process. Manufacturing with less than 250-V CDM is possible with the necessary precautions. Pins listed as ±1500 V may actually have higher performance.

### 6.3 ESD Ratings—IEC Specification

		VALUE	UNIT
V <sub>(ESD)</sub>	Electrostatic discharge	IEC 61000-4-2 contact discharge	±12000
		IEC 61000-4-2 air-gap discharge	±15000

### 6.4 Recommended Operating Conditions

over operating free-air temperature range (unless otherwise noted)

		MIN	MAX	UNIT
V <sub>IO</sub>	Input pin voltage	0	5.5	V
T <sub>A</sub>	Operating free-air temperature	–40	125	°C

### 6.5 Thermal Information

THERMAL METRIC <sup>(1)</sup>		TPD1E05U06	TPD4E05U06	TPD6E05U06	UNIT
		DPY (X1SON)	DQA (USON)	RVZ (USON)	
		2 PINS	10 PINS	14 PINS	
R <sub>θJA</sub>	Junction-to-ambient thermal resistance	697.3	327	197.9	°C/W
R <sub>θJC(top)</sub>	Junction-to-case (top) thermal resistance	471	189.5	119.1	°C/W
R <sub>θJB</sub>	Junction-to-board thermal resistance	575.9	257.7	92.6	°C/W
ψ <sub>JT</sub>	Junction-to-top characterization parameter	175.7	60.9	22	°C/W
ψ <sub>JB</sub>	Junction-to-board characterization parameter	575.1	257	91.6	°C/W

- (1) For more information about traditional and new thermal metrics, see the [Semiconductor and IC Package Thermal Metrics](#) application report.

## 6.6 Electrical Characteristics

over operating free-air temperature range (unless otherwise noted)

PARAMETER		TEST CONDITIONS	MIN	TYP	MAX	UNIT
$V_{RWM}$	Reverse stand-off voltage	$I_{IO} < 10 \mu A$			5.5	V
$V_{BR}$	Break-down voltage	$I_{IO} = 1 \text{ mA}$	6.5		8.5	V
$V_{clamp}$	Clamp voltage	$I = 1 \text{ A}$ , TLP, I/O to ground <sup>(1)</sup>		10		V
		$I = 5 \text{ A}$ , TLP, I/O to ground <sup>(1)</sup>		14		
		$I = 1 \text{ A}$ , TLP, ground to I/O <sup>(1)</sup>		3		
		$I = 5 \text{ A}$ , TLP, ground to I/O <sup>(1)</sup>		7		
$I_{LEAK}$	Leakage current	$V_{IO} = 2.5 \text{ V}$		0.01	10	nA
$R_{DYN}$	DPY package dynamic resistance	I/O to GND <sup>(2)</sup>		0.8		$\Omega$
		GND to I/O <sup>(2)</sup>		0.8		
	DQA package dynamic resistance	I/O to GND <sup>(2)</sup>		0.8		$\Omega$
		GND to I/O <sup>(2)</sup>		0.8		
	RVZ package dynamic resistance	I/O to GND <sup>(2)</sup>		0.8		$\Omega$
		GND to I/O <sup>(2)</sup>		0.8		
<b>Capacitance</b>						
$C_L$	Line capacitance <sup>(3)</sup>	$V_{IO} = 2.5 \text{ V}$ , $f = 1 \text{ MHz}$ , I/O to GND	TPD1E05U06 DPY package	0.42		pF
			TPD4E05U06 DQA package	0.5		
			TPD6E05U06 RVZ package	0.47		
$\Delta C_{IO-TO-GND}$	Variation of channel input capacitance	GND Pin = 0 V, $F = 1 \text{ GHz}$ , $V_{BIAS} = 2.5 \text{ V}$ , channel_x pin to GND – channel_y pin to GND		0.05	0.07	pF
$C_{CROSS}$	Channel to channel input capacitance	GND Pin = 0 V, $F = 1 \text{ GHz}$ , $V_{BIAS} = 2.5 \text{ V}$ , between channel pins		0.01	0.06	pF

(1) Transmission Line Pulse (TLP) with 100 ns width, 200 ps rise time.

 (2) Extraction of  $R_{DYN}$  using least squares fit of TLP characteristics between  $I = 10 \text{ A}$  and  $I = 20 \text{ A}$ .

(3) Capacitance data is taken at 25°C.

## 7 Detailed Description

### 7.1 Overview

The TPDxE05U06 is a family of unidirectional Transient Voltage Suppressor (TVS) based Electrostatic Discharge (ESD) protection diodes with ultra-low capacitance. Each device can dissipate ESD strikes above the maximum level specified by the IEC 61000-4-2 international standard. The TPDxE05U06s ultra-low loading capacitance makes it ideal for protecting any high-speed signal pins.

### 7.2 Functional Block Diagram

Figure 11. TPD1E05U06 Block Diagram

Figure 12. TPD4E05U06 Block Diagram

Figure 13. TPD6E05U06 Block Diagram

### 7.3 Feature Description

The TPDxE05U06 is a family of unidirectional Transient Voltage Suppressor (TVS) Electrostatic Discharge (ESD) protection diodes with ultra-low capacitance. Each device can dissipate ESD strikes above the maximum level specified by the IEC 61000-4-2 international standard. The TPDxE05U06s ultra-low loading capacitance makes it ideal for protecting any high-speed signal pins.

#### 7.3.1 ±15-kV IEC61000-4-2 Level 4 ESD Protection

The I/O pins can withstand ESD events up to ±12-kV contact and ±15-kV air. An ESD-surge clamp diverts the current to ground.

#### 7.3.2 IEC61000-4-4 EFT Protection

The I/O pins can withstand an electrical fast transient burst of up to 80 A (5/50 ns waveform, 4 kV with 50-Ω impedance). An ESD-surge clamp diverts the current to ground. This has been validated on the TPD4E05U06 only.

#### 7.3.3 IEC61000-4-5 Surge Protection

The I/O pins can withstand surge events up to 2.5 A and 40 W (8/20 μs waveform). An ESD-surge clamp diverts this current to ground.

#### 7.3.4 I/O Capacitance

The capacitance between each I/O pin to ground is 0.42 pF (TPD1E05U06), 0.5 pF (TPD4E05U06) or 0.47 pF (TPD6E05U06). These devices support data rates up to 6 Gbps.

#### 7.3.5 DC Breakdown Voltage

The DC breakdown voltage of each I/O pin is a minimum of 6 V. This ensures that sensitive equipment is protected from surges above the reverse standoff voltage of 5 V.

#### 7.3.6 Ultra-Low Leakage Current

The I/O pins feature an ultra-low leakage current of 10 nA (max) with a bias of 2.5 V.

#### 7.3.7 Low ESD Clamping Voltage

The I/O pins feature an ESD clamp that is capable of clamping the voltage to 10 V ( $I_{PP} = 1$  A).

#### 7.3.8 Industrial Temperature Range

This device features an industrial operating range of –40°C to +125°C.

#### 7.3.9 Easy Flow-Through Routing

The layout of this device makes it simple and easy to add protection to an existing layout. The packages offers flow-through routing, requiring minimal modification to an existing layout.

### 7.4 Device Functional Modes

The TPDxE05U06 is a passive integrated circuit that triggers when voltages are above VBR or below the lower diodes  $V_f$  (–0.6 V). During ESD events, voltages as high as ±15 kV (air) can be directed to ground via the internal diode network. When the voltages on the protected line fall below the trigger levels of TPDxE05U06 (usually within 10s of nano-seconds) the device reverts to passive.

## 8 Application and Implementation

### NOTE

Information in the following applications sections is not part of the TI component specification, and TI does not warrant its accuracy or completeness. TI's customers are responsible for determining suitability of components for their purposes. Customers should validate and test their design implementation to confirm system functionality.

### 8.1 Application Information

The TPDxE05U06 is a diode type TVS which is typically used to provide a path to ground for dissipating ESD events on hi-speed signal lines between a human interface connector and a system. As the current from ESD passes through the TVS, only a small voltage drop is present across the diode. This is the voltage presented to the protected IC. The low  $R_{DYN}$  of the triggered TVS holds this voltage,  $V_{CLAMP}$ , to a safe level for the protected IC.

### 8.2 Typical Applications

#### 8.2.1 HDMI 2.0 Application

**Figure 14. HDMI 2.0 Schematic**

## Typical Applications (continued)

### 8.2.1.1 Design Requirements

For this design example, the two TPD4E05U06 devices, and a TPD5S116 are being used in an HDMI 2.0 application. This provides a complete port protection scheme.

Given the HDMI 2.0 application, the parameters listed in [Table 1](#) are known.

**Table 1. Design Parameters**

DESIGN PARAMETER	VALUE
Signal range on pins 1, 2, 4, or 5	0 V to 5 V
Operating frequency	3 GHz

### 8.2.1.2 Detailed Design Procedure

#### 8.2.1.2.1 Signal Range on Pin 1, 2, 4, or 5

The TPD4E05U06 has 4 identical protection channels for signal lines. The symmetry of the device provides flexibility when selecting which of the 4 I/O channels is going to protect which signal lines. Any I/O supports a signal range of 0 to 5.5 V.

### 8.2.1.3 Application Curves

**Figure 15. 3.4-Gbps HDMI 1.4 TP1 Eye Diagram Unpopulated EVM**

**Figure 16. 3.4-Gbps HDMI 1.4 TP1 Eye Diagram TPD1E05U06**

Figure 22. 6-Gbps HDMI 2.0 (TP1) Eye Diagram TPD6E05U06

### 8.2.2 HDMI 2.0 Application

Figure 23. HDMI 2.0 Schematic

### 8.2.2.1 Design Requirements

For this design example, the TPD1E05U06 and the TPD5S116 are used to protect the data pairs and control lines of the HDMI 2.0 connection. This provides full HDMI 2.0 port protection.

Given the HDMI 2.0 application, the following parameters in [Table 2](#) are known.

**Table 2. Design Parameters**

DESIGN PARAMETER	VALUE
Signal range on data lines	0 V to 5 V
Operating frequency	3 GHz

### 8.2.2.2 Detailed Design Procedure

#### 8.2.2.2.1 Signal Range

The TPD1E05U06 has 1 protection channel for signal lines, supporting a signal range of 0 V to 5.5 V.

#### 8.2.2.2.2 Operating Frequency

The TPD1E05U06 has 0.42 pF of capacitance, which supports HDMI 2.0 data rates.

#### 8.2.2.3 Application Curves

Refer to the [Application Curves](#) section.

## 9 Power Supply Recommendations

This device is a passive ESD protection device and there is no need to power it. Care must be taken to make sure that the maximum voltage specifications for each line are not violated.

## 10 Layout

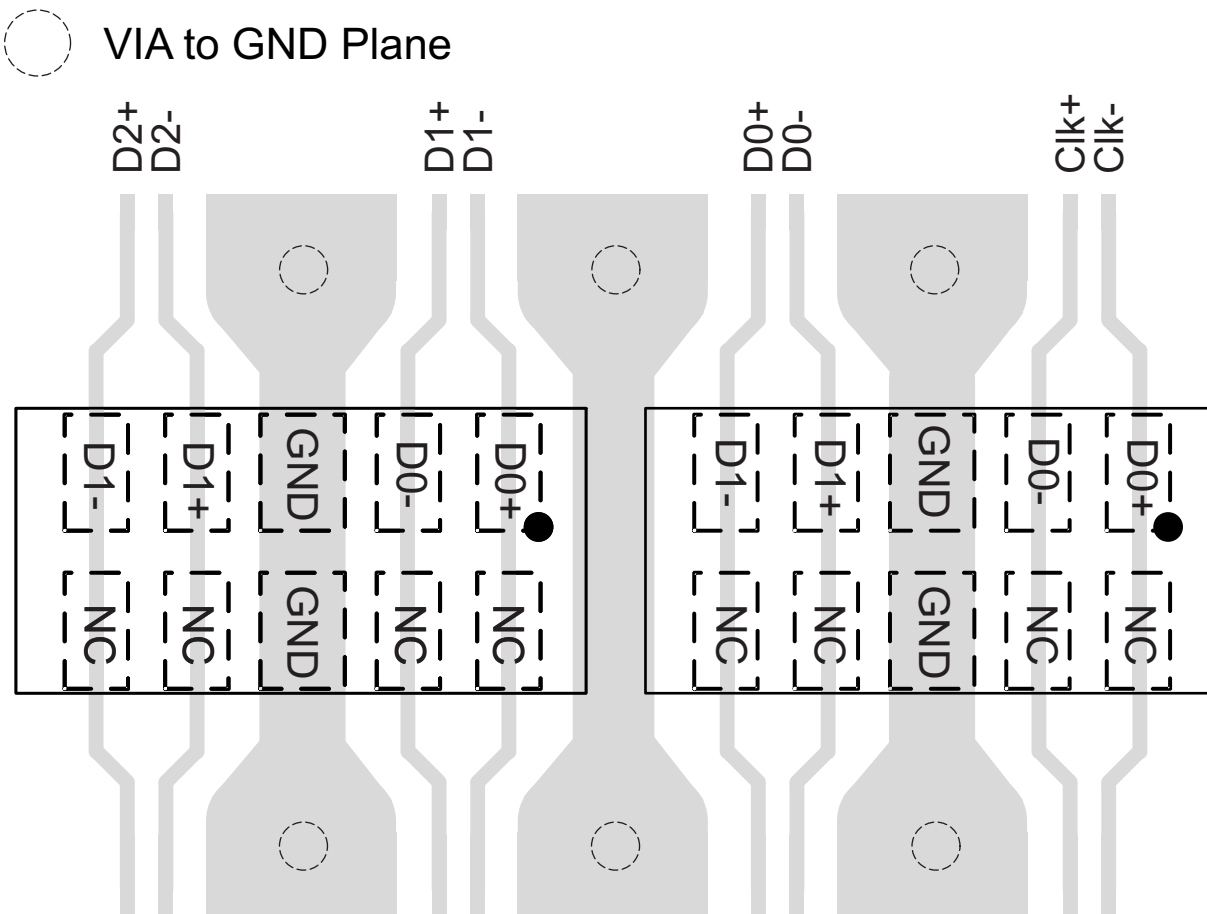

### 10.1 Layout Guidelines

- The optimum placement is as close to the connector as possible.
  - EMI during an ESD event can couple from the trace being struck to other nearby unprotected traces, resulting in early system failures.
  - The PCB designer needs to minimize the possibility of EMI coupling by keeping any unprotected traces away from the protected traces which are between the TVS and the connector.
- Route the protected traces as straight as possible.
- Eliminate any sharp corners on the protected traces between the TVS and the connector by using rounded corners with the largest radii possible.
  - Electric fields tend to build up on corners, increasing EMI coupling.

### 10.2 Layout Example

#### 10.2.1 TPD4E05U06 Layout Example

This application is typical of an HDMI 1.4 layout.

**Figure 24. TPD4E05U06 Layout**

**Layout Example (continued)**

**10.2.2 TPD1E05U06 Layout Example**

This application is typical of an HDMI 2.0 layout.

**Figure 25. TPD1E05U06 Layout**

## 11 Device and Documentation Support

### 11.1 Documentation Support

#### 11.1.1 Related Documentation

#### 11.3 Receiving Notification of Documentation Updates

To receive notification of documentation updates—including silicon errata—go to the product folder for your device on [ti.com](http://ti.com). In the upper right-hand corner, click the *Alert me* button. This registers you to receive a weekly digest of product information that has changed (if any). For change details, check the revision history of any revised document.

#### 11.4 Community Resources

The following links connect to TI community resources. Linked contents are provided "AS IS" by the respective contributors. They do not constitute TI specifications and do not necessarily reflect TI's views; see TI's [Terms of Use](#).

**TI E2E™ Online Community** *TI's Engineer-to-Engineer (E2E) Community*. Created to foster collaboration among engineers. At [e2e.ti.com](http://e2e.ti.com), you can ask questions, share knowledge, explore ideas and help solve problems with fellow engineers.

**Design Support** *TI's Design Support* Quickly find helpful E2E forums along with design support tools and contact information for technical support.

#### 11.5 Trademarks

E2E is a trademark of Texas Instruments.  
 PCI-Express is a registered trademark of PCI-SIG .  
 V-by-One is a registered trademark of Thine Electronics, Inc.  
 All other trademarks are the property of their respective owners.

#### 11.6 Electrostatic Discharge Caution

These devices have limited built-in ESD protection. The leads should be shorted together or the device placed in conductive foam during storage or handling to prevent electrostatic damage to the MOS gates.

## 11.7 Glossary

[SLYZ022](#) — *TI Glossary*.

This glossary lists and explains terms, acronyms, and definitions.

## 12 Mechanical, Packaging, and Orderable Information

The following pages include mechanical, packaging, and orderable information. This information is the most current data available for the designated devices. This data is subject to change without notice and revision of this document. For browser-based versions of this data sheet, refer to the left-hand navigation.

(1) The marketing status values are defined as follows:

**ACTIVE:** Product device recommended for new designs.

**LIFEBUY:** TI has announced that the device will be discontinued, and a lifetime-buy period is in effect.

**NRND:** Not recommended for new designs. Device is in production to support existing customers, but TI does not recommend using this part in a new design.

**PREVIEW:** Device has been announced but is not in production. Samples may or may not be available.

**OBSELETE:** TI has discontinued the production of the device.

(2) **RoHS:** TI defines "RoHS" to mean semiconductor products that are compliant with the current EU RoHS requirements for all 10 RoHS substances, including the requirement that RoHS substance do not exceed 0.1% by weight in homogeneous materials. Where designed to be soldered at high temperatures, "RoHS" products are suitable for use in specified lead-free processes. TI may reference these types of products as "Pb-Free".

**RoHS Exempt:** TI defines "RoHS Exempt" to mean products that contain lead but are compliant with EU RoHS pursuant to a specific EU RoHS exemption.

**Green:** TI defines "Green" to mean the content of Chlorine (Cl) and Bromine (Br) based flame retardants meet JS709B low halogen requirements of <=1000ppm threshold. Antimony trioxide based flame retardants must also meet the <=1000ppm threshold requirement.

(3) MSL, Peak Temp. - The Moisture Sensitivity Level rating according to the JEDEC industry standard classifications, and peak solder temperature.

(4) There may be additional marking, which relates to the logo, the lot trace code information, or the environmental category on the device.

(5) Multiple Device Markings will be inside parentheses. Only one Device Marking contained in parentheses and separated by a "-" will appear on a device. If a line is indented then it is a continuation of the previous line and the two combined represent the entire Device Marking for that device.

(6) Lead/Ball Finish - Orderable Devices may have multiple material finish options. Finish options are separated by a vertical ruled line. Lead/Ball Finish values may wrap to two lines if the finish value exceeds the maximum column width.

**Important Information and Disclaimer:**The information provided on this page represents TI's knowledge and belief as of the date that it is provided. TI bases its knowledge and belief on information provided by third parties, and makes no representation or warranty as to the accuracy of such information. Efforts are underway to better integrate information from third parties. TI has taken and

continues to take reasonable steps to provide representative and accurate information but may not have conducted destructive testing or chemical analysis on incoming materials and chemicals. TI and TI suppliers consider certain information to be proprietary, and thus CAS numbers and other limited information may not be available for release.

In no event shall TI's liability arising out of such information exceed the total purchase price of the TI part(s) at issue in this document sold by TI to Customer on an annual basis.

DQA (R-PSON-N10)

PLASTIC SMALL OUTLINE NO-LEAD

4209584/B 09/2009

- NOTES:
- A. All linear dimensions are in millimeters. Dimensioning and tolerancing per ASME Y14.5M-1994.
  - B. This drawing is subject to change without notice.
  - C. SON (Small Outline No-Lead) package configuration.

DQA (R-PUSON-N10)

PLASTIC SMALL OUTLINE NO-LEAD

- NOTES:
- All linear dimensions are in millimeters.
  - This drawing is subject to change without notice.
  - Publication IPC-7351 is recommended for alternate designs.
  - Customers should contact their board fabrication site for minimum solder mask web tolerances between signal pads.
  - Maximum stencil thickness 0,127 mm (5 mils). All linear dimensions are in millimeters.
  - Laser cutting apertures with trapezoidal walls and also rounding corners will offer better paste release. Customers should contact their board assembly site for stencil design recommendations. Refer to IPC 7525 for stencil design considerations.
  - Side aperture dimensions over-print land for acceptable area ratio > 0.66. Customer may reduce side aperture dimensions if stencil manufacturing process allows for sufficient release at smaller opening.

DPY (R-PX1SON-N2)

PLASTIC SMALL OUTLINE NO-LEAD
